

Civil Engineer

Job Description

AGM Engineering Ltd. provides a wide range of consulting services for municipal infrastructure and land development projects including design, project management, contract administration, and inspection. We are currently seeking candidates for the position of **Civil Engineer**. Candidates should possess at least 5 years of related experience in servicing design, storm water management design, grading design, technical design reports, servicing studies, contract document preparation, and contract administration.

Qualifications:

- University Degree in Civil Engineering
- Licensed as a Professional Engineer with Professional Engineers Ontario
- Minimum 5 years experience with Municipal and Land Development Projects
- Working Knowledge of AutoCAD 2019 and Civil 3-D
- Working Knowledge of design software such as SWMHYMO, MIDUSS, HEC-RAS, Culvert Master, PCSWMM and WaterCAD will be considered an asset
- Excellent communication skills and the ability to work within a team environment

Responsibilities:

- Provide Project Management for Land Development and Infrastructure Renewal Projects
- Engagement with clients including project meeting attendance
- Provide guidance to design team members including survey staff for topographic and legal surveys
- Prepare Construction Cost Estimates, Forms of Tender and Special Provisions
- Have a strong understanding of the Planning Process for Plans of Subdivision, Condominiums and Site Plan Applications
- Prepare Servicing Reports to support Draft Plan Applications and Applications for Site Plan Approvals
- Lot Grading Design and Certification

Applicants with less than 5 years of related experience may be considered for a junior role

Interested and qualified candidates are invited to submit their résumé and cover letter by email to the attention of Hendrik Schuurmans, P.Eng., Manager of Engineering Services, info@agm.on.ca
